THE JOURNAL OF AMERICAN ASSOCIATION OF CEREAL CHEMISTS
Vol. 1, 2, 3, 4, 5, and 6—1915-21

AUTHORS INDEX

*Letter Period Div
1919-21*

*706
1627*

Anderson, F. A.	Chemical independence in	8
Anderson, F. A.	Co-operation between the laboratory and Mill V, 2	4
Auld, Gordon	The function of a cereal chemist -----II, 2	6
Barker, J. Wm.	See Jones, A. A. -----	
Buck, C. F.	The gasoline color of flour -----II, 2	17
Buck, C. F.	The Buck mixer -----IV, 1	22
Estabrook, A. W.	Nitrogen determination on cereals -----I, 2	6
Estabrook, A. W.	A new filtering apparatus -----II, 1	7
Goldtrap, W. A.	Ash determinations -----II, 2	14
Harper, O. W.	Are tongs too short? -----V, 1	20
Hess, J. R.	The Enzymes in the dry wheat kernel -----III, 1	16
Hess, J. R.	To the cereal chemist -----V, 1	1
Hess, J. R.	A volumetric method for the determination of sugars in flour -----V, 1	7
Hogan, J. M.	The electric concave element -----IV, 1	18
Herman, R. S. and Walter Hall	Variation of moisture content of flour during storage -----VI, 3	10
Jacobs, R. R.	Laboratory mill control data -----IV, 1	16
Jones, A. A.	Accuracy of ash determinations -----V, 1	3
Jones, A. A. and J. Wm. Barker	An investigation of the defects of the official Brown-Duval moisture tester and a pro- posed remedy -----VI, 4	5
Lawellin, S. J.	Special protein burette -----IV, 1	19
Lawellin, S. J.	Experiment on suggested method for determi- nation of gluten by dissolving in acetic acid -----V, 1	9
Lawellin, S. J.	Practical hood design -----V, 2	14
Lawellin, S. J.	Rapid volumetric determination of reducing sugars in cereal products -----VI, 1	3
Lawellin, S. J.	Relation of grade, class, and originating point of wheat to volume of bread from flour made therefrom, I -----VI, 1	7
Lawellin, S. J.	Notes on sugar determination -----VI, 1	10

Lawellin, S. J.	Relation of grade, class, and origination point of wheat to volume of bread from flour made therefrom, II -----	VI, 2	14
Lawellin, S. J.	A criticism -----	VI, 4	1
Lawellin, S. J.	Notes of bread troubles -----	VI, 4	5
Lawellin, S. J.	Preparation of standard solution -----	VI, 4	5
Lawellin, S. J.	Further observation on the use of glacial acetic acid in gluten determinations -----	VI, 3	7
Leatherock, L. E.	A combination burette -----	IV, 1	22
Lee, Dr. Ralph E.	What is yeast? -----	VI, 2	8
Loomis, Fred H.	The effect on the test and weight of wheat by the addition of water -----	II, 1	10
Lusk, R. A.	Automatic alarm for moisture tester -----	IV, 1	24
Lyman, G. S.	Colloid chemistry and the cereal chemist -----	VI, 3	11
Mann, M. C.	The chemist and the sales department -----	VI, D	2
McLaren, L. H.	See Patterson, C. J. (Protein hydrolysis) -----		
McLaren, L. H.	Separation of some of the amino acids from wheat proteins -----	IV, 1	5
Mitchell, R. W. and Wahlin, E. G.	Report on moisture determination -----	I, 2	11
Mitchell, R. W.	Gluten -----	I, 1	13
Mitchell, R. W.	Chemical control in the bakery -----	VI, 1	11
Olsen, Leslie R.	Gliadin -----	II, 2	9
Patterson, P. M.	Effect of chlorine and oxide of nitrogen on fates of wheat -----	I, 1	8
Patterson, P. M.	A flour storage experiment -----	I, 2	10
Patterson, C. J.	Dried gluten becoming obsolete -----	I, 1	9
Patterson, C. J.	The official method for the determination of crude fibre as applied to pure wheat bran -----	I, 2	8
Patterson, C. J.	Fermentation -----	II, 1	6
Patterson, C. J.	Protein and its value to the flour milling industry -----	II, 2	7
Patterson, C. J.	The chemist -----	VI, 2	7
Patterson, C. J. and L. M. McLaren	"Protein hydrolysis" -----	III, 1	10
Rask, O. S.	See Jacobs, R. R. -----		
Roos, Hugo	Remarks at annual banquet -----	V, 1	2
Sasse, A. R.	Investigation of peroxide process -----	III, 1	20
Sasse, A. R.	Auto-digestion of yeast and the effect of the autolystate on fermentation -----	IV, 1	9

Correction in

July no.

Lawellin, S. J.	Relation of grade, class, and origination point of wheat to volume of bread from flour made therefrom, II -----	VI, 2	14
Lawellin, S. J.	A criticism -----	VI, 4	1
Lawellin, S. J.	Notes of bread troubles -----	VI, 4	5
Lawellin, S. J.	Preparation of standard solution -----	VI, 4	5
Lawellin, S. J.	Further observation on the use of glacial acetic acid in gluten determinations -----	VI, 3	7
Leatherock, L. E.	A combination burette -----	IV, 1	22
Lee, Dr. Ralph E.	What is yeast? -----	VI, 2	8
Loomis, Fred H.	The effect on the test and weight of wheat by the addition of water -----	II, 1	10
Lusk, R. A.	Automatic alarm for moisture tester -----	IV, 1	24
Lyman, G. S.	Colloid chemistry and the cereal chemist -----	VI, 3	11
Mann, M. C.	The chemist and the sales department -----	VI, D	2
McLaren, L. H.	See Patterson, C. J. (Protein hydrolysis) -----		
McLaren, L. H.	Separation of some of the amino acids from wheat proteins -----	IV, 1	5
Mitchell, R. W. and Wahlin, E. G.	Report on moisture determination -----	I, 2	11
Mitchell, R. W.	Gluten -----	I, 1	13
Mitchell, R. W.	Chemical control in the bakery -----	VI, 1	11
Olsen, Leslie R.	Gliadin -----	II, 2	9
Patterson, P. M.	Effect of chlorine and oxide of nitrogen on fates of wheat -----	I, 1	8
Patterson, P. M.	A flour storage experiment -----	I, 2	10
Patterson, C. J.	Dried gluten becoming obsolete -----	I, 1	9
Patterson, C. J.	The official method for the determination of crude fibre as applied to pure wheat bran -----	I, 2	8
Patterson, C. J.	Fermentation -----	II, 1	6
Patterson, C. J.	Protein and its value to the flour milling industry -----	II, 2	7
Patterson, C. J.	The chemist -----	VI, 2	7
Patterson, C. J. and L. M. McLaren	"Protein hydrolysis" -----	III, 1	10
Rask, O. S.	See Jacobs, R. R. -----		
Roos, Hugo	Remarks at annual banquet -----	V, 1	2
Sasse, A. R.	Investigation of peroxide process -----	III, 1	20
Sasse, A. R.	Auto-digestion of yeast and the effect of the autolystate on fermentation -----	IV, 1	9

Sasse, A. R.	Assay of chlorine gas -----	I, 1	11
Sasse, A. R.	The food value of white and brown bread -----	I, 1	12
Sasse, A. R.	Analysis of Kansas hard winter patent flour from 1915 and 1916 crops -----	II, 1	9
Sasse, A. R.	Correction of "The auto-digestion of yeast." (IV, 1) -----		
Sasse, A. R.	A message from the American Association of Cereal Chemists -----	VI, 3	4
Schulz, M. E.	Calculation of B. T. U. of coal from approxi- mate analysis -----	V, 1	17
Schulz, M. E.	A method of drying gluten -----	V, 2	13
Schulz, M. E.	Ash determination -----	VI, 4	9
Southwell, C. R.	Notes on sugar determination -----	II, 1	12
Tague, E. L.	Some neglected constituents of flour -----	IV, 1	11
Wahlin, E. G.	See Mitchell, R. Wallace -----		
Weaver, H. E.	The relation of ash and gluten in wheat flour -----	VI, 2	11
Weaver, H. E.	Some tests on damaged wheat -----	I, 2	14
Weaver, H. E.	Investigations into the methods of determin- ing soluble protein, reducing sugars, acid- ity and soluble extract: Their causes and effects -----	III, 1	5
Weaver, H. E. and Wood, C. J.	The proteoclastic enzymes in flour and action of enzymes in bread making -----	V, 2	6
Westman, S. E.	Protein factors -----	II, 1	8
Wood, C. J.	See Weaver, H. E. -----		
Yohe, Dean	Some nitrogen determinations -----	V, 1	19
Yohe, Dean	Alligation -----	VI, 2	16

SUBJECT INDEX

Absorption, Ed.	VI, 2	6
Adulterations, abs.	I, 1	15
Adulteration of bread, abs.	I, 2	16
Alligation	VI, 2	16
Alkalinity and phosphate determination in the ash of foods	VI, 4	15
Amino acids from wheat protein, Separation of some of the	IV, 1	5
Analysis, Official methods of A. A. of C. C.	V, 2	15
Analysis, Tentative methods of A. A. of C. C.	V, 2	16
Analysis, comparative	II, 1	14
Analysis, Results of (Ed.)	VI, 6	6
Apparatus, An electric concave element	IV, 1	18
Apparatus, Special protein burette	IV, 1	19
Apparatus, The Buck mixer	IV, 1	22
Apparatus, A combination burette	IV, 1	23
Apparatus, Automatic alarm for moisture testing	IV, 1	24
Apparatus, Are tongs too short?	V, 1	20
Apparatus, Practical hood design	V, 2	14
Ash determinations	II, 2	14
Ash determinations	VI, 4	9
Ash determinations, Accuracy of	V, 2	3
Ash and gluten in wheat flour, The relation of	I, 1	5
Baking formula, Our	I, 2	14
Bacteriology as applied to baking	VI, 1	14
Baking formula, Uniform	VI, 6	6
Baking, The swelling of gluten protein and its significance for the problem of capacity for	VI, 2	19
Bearing metals and their industrial application	VI, 2	22
Boiler tubes, Constitution and properties	VI, 2	21
Books of interest to the cereal chemist	V, 2	13
Bran as a human food	V, 1	17
Bread, The food value of white and brown	I, 1	12
Bread, Rope in, (Ab.)	I, 1	14
Bread, Dough fermentation (Ab.)	I, 1	14
Bread of certain mineral constituents, On the deficiency in (Ab.)	I, 1	14
Bread by means of natural lactic acid, Better—	I, 2	16
Bread-making method, New (Ab.)	V, 1	17
Bread, Buttermilk (Ab.)	V, 1	17
Bread, relation of grade, class, and originating point of wheat to volume of, baked from flour made therefrom (I)	VI, 1	7
(II)	VI, 2	14
Bread, Patent	VI, 2	20
Bread, Notes on, troubles	VI, 4	2
Bread-making, Relation between the mechanical properties of dough, and,	VI, 4	9

Bread, Analytical investigations on a, prepared with wheat dough	VI, 4	10
Bread, The leavening of, and baked goods	VI, 4	13
Bread, Control of rope in	VI, 4	15
Bread, Calcium peroxide in, making	VI, 4	15
Bread-making, Chemistry of	VI, 2	31
Bread-making ingredients	VI, 2	20
Bread troubles, Notes on	VI, 4	2
Bread yeast, Some experiments conducted with pure culture of	VI, 2	18
Bread-making properties of flour and on the fermentation of yeast, An experiment study of the effect of certain organic and inor- ganic substances on the	VI, 2	19
Bulletins of interest to the cereal chemist	VI, 1	16
Bulletins of interest to the cereal chemist	V, 2	12

Cellulose, Conversion of, into glucose	VI, 2	31
Cereal Chemist, The function of	II, 2	6
Cereals, Determination of moisture in	VI, 4	15
Cereal grains, The composition of, mistakes made in locating the chemical constituents of wheat and rice grains, aleurone	VI, 4	10
Cereal products, Report on	I, 2	16
Cereal products, Report of	VI, 2	30
Chemist, The	VI, 2	7
Chemist, The—and the sales department	V, 2	2
Chemical control in the bakery	VI, 1	11
Chemical independence of America	IV, 1	8
Chemistry and the food industry	VI, 2	28
Chlorine gas, Assay of	I, 1	11
Coal, Calculation of B. T. U. of,—from approximate analysis	V, 1	17
Colloid chemistry and the cereal chemist	VI, 3	11
Constitution of the A. A. of C. C.	VI, 2, 3	32
Co-operation between the laboratory and mill	V, 2	4
Copper, determination of (particularly with respect to sugar deter- minations) by means of potassium thiocyanate and potassium iodide	VI, 2	24
Criticism, A	VI, 4	2
Crude fibre, A furnace for	I, 2	16
Crude fibre, An apparatus for digesting	I, 2	16
plied to pure wheat bran	I, 2	8
Crude fibre, Investigation of the estimation of	VI, 2	29
Crude fibre, Report on	VI, 2	23
Crude fibre, Suggested modification of the method for	VI, 4	13
Crude fibre, The official method for the determination of, as applied to cottonseed meal	I, 1	14
Crude fibre, The official method for the determination of, as ap-		

Diastatic power of malts, Iodometric determination of the	VI, 4	16
Dough, The viscosity of	I, 1	14
Dust explosion caused by broken extension light	VI, 2	28

Electrified seeds	V, 1	19
Enzymes present in the dry wheat kernel	III, 1	16
Enzymes in flour and action of enzymes in bread making, The proteoclastic	V, 2	6
Enzyme kinetics, Colloid chemical bases of	VI, 2	28
Enzymes, The distribution of, and proteins in the endosperm of the wheat berry	VI, 2	30
Enzymes, The activity of, under abnormal conditions and the alleged aldehyde nature of enzymes	VI, 2	27
Enzymes, The nature of	VI, 2	22
Enzymes, The Proteoclastic—in flour and action of enzymes in bread-making	V, 2	6
Enzymes, II, oxidizing; The nature of the enzymes associated with certain direct oxidizing systems in plants	VI, 2	20
Enzymes, III, invertase and other enzymes of germinated barley	VI, 2	27
Experimental milling (Ed.)	VI, 2	3
Fermentation	II, 1	6
Fermentation, Auto-digestion of yeast and the effect of the auto-lysate on	IV, 1	9
Fermentation, Digestion of yeast and the effect of the auto-lysate on, (correction)	V, 1	20
Fermentation, Studies in, V. enzyme formation through the action of ions	VI, 4	11
Feeding stuffs, Standardization of	V, 1	17
Fibrinogen, A laboratory method for the preparation of	VI, 4	12
Filtering Apparatus	II, 1	7
Filters, The use of membrane, in chemical analysis	VI, 2	24
Filtration with alundum crucible, Note on	VI, 2	17
Flour, Action of hydrogen peroxide on	VI, 2	18
Flours, A method for determining the relative merit of (Ed.)	VI, 2	5
Flour, A method for the determination of the strength and baking qualities of wheat	I, 2	16
Flour as a food	II, 1	13
Flours as food stuffs and the question of vitamins	VI, 4	12
Flour, Bleaching and Conditioning,—and meal	VI, 4	16
Flour bleaches, In the U. S. A.	VI, 4	9
Flour characteristics	I, 2	16
Flour, Comparative baking tests and analysis of hard and soft winter wheat	II, 1	13
Flour, Finely ground, and bread prepared therefrom	VI, 2	29
Flour, from crop of 1915 and 1916, Analysis of Kansas hard wheat patent	II, 1	9
Flours, Industrial classification of starches and,—their commercial designations	VI, 4	14
Flours, Kansas	I, 1	14
Flour made from 1919 wheat, Baking qualities	V, 1	17
Flour mill chemist, The (Ed.)	VI, 2	2
Flour milling and the cereal chemist	VI, 4	12

Flour, Properties affecting strength in wheaten	VI, 3	13
Flour storage experiment, A	I, 2	10
Flour, Some neglected constituents of	IV, 1	11
Flour tests, Discussion of	II, 1	13
Flour, The gasoline color value of	II, 2	17
Flour, The relation of ash and gluten in wheat.....	VI, 2 11—I, 1	5
Flour, The heat of hydration and specific heat of wheat	VI, 3	14
Flour, The significance of defecation in connection with absorption		
Flour, The hygroscopic moisture of, exposed to atmosphere of dif- ferent relative humidity	VI, 2	20
Flour, The identification from the chemico-legal view point of a flour which has been subjected to the effects of baking.....	VI, 4	12
Flour, The acid character of	VI, 4	13
Flour, Variation in moisture contents of, during storage	VI, 3	10
Flour, Wheat, its food and money value	I, 2	16
Foods and feeding stuffs, Report on water in	VI, 2	23
Food, cattle, The preparation and analysis of a, consisting of hy- drolysed sawdust	VI, 2	28
Fumigation of mill, effect of carbon bisulphide and hydrocyanic acid I, 1	15	
of the nitrogen of bread with unbolted, VI, 3, 14.....	VI, 4	18
Gliadin	II, 2	9
Gliadin in flour and gluten, The qualitative estimation	I, 2	16
Glucose and starch, Determination of,—by the alkaline potassium permanganate	VI, 2	21
Gluten	I, 1	13
Gluten, A method for drying	V, 2	13
Gluten and water-soluble protein in 65 per cent wheat flours of the harvest of 1919	VI, 4	15
Gluten, Dried—becoming obsolete	I, 1	9
Gluten, Experiment on suggested method for determination of— by dissolving in acetic acid	V, 1	9
Gluten, Further observations on the use of glacial acetic acid in,— determinations	VI, 3	7
Gluten in Italian pastes	VI, 2	20
Gluten products and 'diabetic' food	I, 2	16
Gluten, Tests regarding	I, 1	15
Indicator, Use of sodium alizarin as,—in ammonia titration.....	I, 1	15
Insects, Experiments on the toxic action of certain gases on,—seeds, and fungi	VI, 3	13
Insect control of flour mills	VI, 2	30
Iodometric studies, I, The determination of iodine by titration with sodium thiosulphate	VI, 2	30
Kjeldahl distillation apparatus, A new and improved form of.....	I, 1	14
Kjeldahl distillation apparatus, A	I, 2	16
Kjeldahl method for nitrogen determination, A note on	I, 2	16

Kjeldahl nitrogen determinations, The influence of potassium permanganate	VI, 2	18
Laboratory practice, Contributions from	VI, 4	17
Laboratory mill control data	IV, 1	16
Loaf, Producing popular	I, 1	15
Lubrication, Notes on	VI, 2	28
Lubricating oils, purification and regeneration of used	VI, 2	19
Lubricating oils, The control of	VI, 4	16
Message from the A. A. of C. C.	VI, 3	4
Methods (methods of analysis)	I, 2	5
Milling and baking tests of wheat, containing admixtures of rye, corn, cockle, knoghead, and vetch	I, 2	16
Milling of wheat and testing of flour, The	I, 2	16
Moisture, An investigation of the defects of the official Brown-Duval—Tester and proposed remedy	VI, 4	5
Moisture determinations, report on	I, 2	11
Moisture determinations, Report on (correction)	2, 1	6
Nitrogen determination on cereals	I, 2	6
Nitrogen determinations, Some	V, 1	19
Peroxide process, Investigation of	III, 1	20
Polysaccharides, Chemistry of the	VI, 2	19
Polysaccharides, Chemistry of the (correction and supplement to previous study)	VI, 4	12
Polysaccharides, The constitution of the,—1, the relationship of imulin to fructose	VI, 2	31
Potash, By the Lindo-Gladding method, some results of the determination of—	VI, 2	18
President's message	VI, 3	3
Proceedings of Society, May, 1915	I, 1	1
Proceedings of Society, Feb., 1916	I, 2	1
Proceedings of Society, May, 1916	II, 1	1
Proceedings of Society, May, 1917	II, 2	1
Proceedings of Society, June, 1918	III, 2	1
Proceedings of Society, May, 1919	IV, 1	1
Proceedings of Society, May, 1920	V, 1	4
Proceedings of Society, May, 1921	VI, 2	1
Proteins and colloid chemistry, The	VI, 4	13
Protein and its value to the flour milling industry	II, 2	7
Protein content of wheat	VI, 2	30
Protein factors	II, 1	8
Protein hydrolysis	III, 1	10
Protein, Ion series and the physical properties of proteins II (ab.)	VI, 2	29

Proteins, On the chemical constitution of the,—of wheat flour and its relations to strength	I, 2	16
Proteins, The distribution of,—and proteins in the endo of the wheat berry	VI, 2	30
Protein, The significance of the hydrogen-ion concentration for the digestion of,—by pepsin	VI, 2	29

Reason, The	VI, 2	1
Relation of grade, class and originating point of wheat to volume of bread baked from flour made therefrom	VI, 2	14
Research (editorial.)	VI, 2	4
Research, The Mellon Institute of Industrial (editorial.)	VI, 2	5
Research, The organization of	VI, 2	30
Results of analysis (editorial.)	VI, 2	6

Saccharin, A new reaction of	VI, 2	31
Single deflection method of weighing	V, 1	18
Siphon, An automatic	VI, 4	17
Soluble proteins, reducing sugars, acidity, soluble extract—an investigation into methods of determining	III, 1	5
Sorption by cellulose, (filter paper) and starch. Study of Imbibition	VI, 2	20
Standard solutions, Preparation of	VI, 4	5
Sugar determinations, Notes on	VI, 1	10
Sugar determination, Notes on	II, 1	12
Sugars in flour, A volumetric method for the determination of	V, 1	7
Sugars, Extractions of grains and cattle foods for the det. of	I, 2	16
Sugars, reducing, Rapid volumetric determination of,—in cereal products	VI, 1	3
Sugar solutions that are to be polarized. A provision against the evaporation during the filtration of—	VI, 2	24
Sugar, Some relation between the configuration and the optical rotary power of some derivatives of acids of the sugar group	VI, 2	24
Sucrose, The determination of,—in the presence of invert sugar and raffinose	VI, 2	19

Technology of bread making (book)	VI, 3	12
---	-------	----

Vacuum pumps, Contrivance to prevent water sucking back from water—	VI, 4	17
Vitamines and yeast growth	VI, 4	10
Vitamines, Water-soluble	VI, 4	19

Waters, Corrosive value of	VI, 2	21
Water, Saving money by—treatment	VI, 2	30

Water, Simple means of holding the—constant in water baths.....	VI, 4	17
Wheat and flour as influenced by handling, storage, heat, moisture, germination. The milling and baking qualities, and chemical composition of—	I, 2	16
Wheat and the flour mill. A handbook for the practical flour		
Wheat at its best	V, 1	18
Wheat, Changes taking place in the tempering of	VI, 4	10
Wheat, Effect of chlorine and oxides of nitrogen on the fat in,—.....	I, 1	8
Wheat flour. I. Electric conductivity of water extracts.....	VI, 4	12
Wheat kernel, The enzymes present in the dry	III, 1	16
millers (book)	VI, 3	14
Wheat, Nitrogenous and phosphoric acid materials in the maturation and germination of wheat	VI, 2	18
Wheat, Qualitative determination of hardness of	I, 1	15
Wheat, Some tests on damaged	I, 2	13
Wheat, The constituents of	I, 2	16
Wheat, The effect on the test and weight of, by the addition of water.....	II, 1	10
Wheat, The relation of Protein content to verify types in American wheat	VI, 4	11

Yeast foods and sweetening agents, what their functions are in the bread	I, 1	14
Yeast, Studies of colloidal state of proteins in,—extract. I. Yeast juice protein in alk. soln. relation to biological process.....	VI, 2	26
Yeast, The nutritional requirements of. I. The role of vitamins in the growth of yeast. II. The effect of compositions of med- ium on the growth of yeast	VI, 2	23
Yeast, The nutritive value of,—in bread	VI, 4	11
Yeast, What is	VI, 2	8
